- 63) Will there be an opportunity for a second round of questions if any answers in the first round of questions needs clarification? **Presently, no.**

All drug wholesalers implement twice yearly drug pricing increases of 3-8% across the board in both January and July each year, so pricing today would be higher than prices paid for the same medications during 2023. **Individual offerors discretion on how to respond.**
- 68) For Attachment A, is the pricing provided in this document from your current vendor based on an actual acquisition cost plus dispensing fee model or an AWP minus a percentage model? Please clarify that you would like vendors to provide pricing based on an actual acquisition cost plus dispensing fee model. **Yes.**
